

NEW

DHW HEAT PUMP
FLEXUS

80L, 120L, 200L e 300L

Stainless steel
DUPLUX 2205*

R290

A+

5 YEARS WARRANTY
3 years full warranty
+ 2 years on parts

Coil temperature sensor

Smart defrost control.
Increases system longevity.

Average tank temperature sensor

Ensures that the water is heated evenly.
Antifreeze protection.

High and low pressure protection

Protects the refrigeration system from excessive pressures to ensure safe operation.

Microchannels

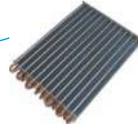

High efficiency aluminum alloy
Microchannel exchanger.

50mm polyurethane foam insulation

Provides high-efficiency insulation,
significantly reducing heat dissipation

Duplex Stainless Steel Tank 2205

The use of materials with greater corrosion resistance contributes to the durability of the components.

Evaporator

Higher efficiency for faster heating,
lower energy consumption and better
performance in different environmental
conditions.

Fan Motor

Provides maximum airflow with
minimum energy consumption
and reduced noise level.

GMCC Compressor

Designed for high efficiency
R290 DHW heat pumps.

Controller

Redesigned interface for easier control.

Capacities

- > Electronic expansion valve
- > Anti-Legionella Function
- > Easy installation
- > Anti-ice protection

FLEXUS color
Gray

FLEXUS - Vers. 03-2025

The specifications described in this table may be subject to change without notice due to typographical errors or technical changes. The advertised warranty is only against manufacturing defects.

DHW HEAT PUMP		FX-80	FX-120	FX-200	FX-200 1S	FX-300	FX-300 1S	DIFFERENT TYPES OF INSTALLATION
Electrical supply	V/Ph/Hz	220 240V/1/ 50Hz						<p>The unit can function not only as a heat pump, but also as a cooling, dehumidifier or energy recovery device.</p>
Rated power	W	2160	2160	2200	2200	2200	2200	
COP*	W/W	3,05	3,14	3,6	3,6	3,8	3,8	
Maximum current	A	1.81 + 6.8 (e-heater)		2.61 + 6.8 (e-heater)				
Maximum water temperature	°C	70						
Max. water temperature	°C	70 (60 without support of electrical resistance)						
Temperature adjustment range	°C	10 - 70						
Working environment temperature	°C	-5-40

**Noise is tested according to EN 12102 with water at 50°C

THE MAGNESIUM ANODE IS A PROTECTIVE ELEMENT THAT PREVENTS CORROSION IN THE INTERIOR TANK.

30% IMPROVED HEAT TRANSFER EFFICIENCY

FAST THERMAL RESPONSE

DURABILITY AND CORROSION RESISTANCE

PV READY FUNCTION
Possibility of integrating a photovoltaic energy source
